

Fact sheet

as of 30.06.2022

The Helvetica Swiss Living Fund invests in Swiss residential properties in good locations. The fund shares are traded over the counter. Only admitted for qualified investors.

Highlights

Review	With the proceeds of the oversubscribed capital increase of CHF 125m, 13 residential properties in attractive locations with a market value of CHF 209m could be purchased. Gross assets value thus grew by 41% from CHF 516m to CHF 727m. The number of rental apartments increased by 454 from 1'176 to 1'630. Since the beginning of the year, 126 apartments have been newly rented, which means that the occupancy rate has remained stable.
Outlook	In June, the purchase contract of a property with 48 apartments in Biel for CHF 16m was signed with transfer of ownership in Q4 2022. Due to increased demand for living space, a further increase in the occupancy rate can be expected. Further growth steps will be approached even more critically, and investments will only be made at market rates of return. If market conditions are good, a further capital increase will be considered.

- You participate in investments in high-quality residential properties in good locations
- Your investment is managed by experienced real estate specialists with a track record of many years
- Your fund shares are tradable over the counter
- A listing on the SIX Swiss Exchange is targeted

What strategies does the fund pursue

Where does the fund invest

The fund invests in Swiss residential properties in the mid-price segment in good locations with strong population growth¹.

Why a growth strategy

The rental housing market has shown deflationary trends for almost 15 years. This has led to housing appearing cheap in terms of disposable income compared to other European countries.

Which cost policy is the focus

The fund generates above-average returns on investment with an above-average TER. For this very reason, the fund performance pursues disciplined cost management, with the long-term goal of keeping the TER REF GAV below 0.80%.

A consistent funding strategy

The fund's low regulatory Debt financing ratio, allows it to strategically focus on and benefit from rather low short-term interest rates. Historically, short-term interest rates have always been lower on average than long-term rates, but somewhat more volatile.

¹ See map chart on page 5, according to the Federal Office for Statistics.

What are the long-term goals

What are the investment objectives of the fund?

The long-term target return is to be 3-4% above the 10-year bonds of the Swiss Confederation. In addition, the Fund management company aims to achieve a long-term attractive and sustainable distribution of profits of around CHF 3 per Fund share.

What is the long-term target size of the fund?

The fund is aiming for a portfolio volume of over CHF 2 billion, distributed among residential properties in German- and French-speaking Switzerland.

What are the fund's sustainability goals?

All properties are to be certified with a recognized certification system by 2032. Where economically feasible, sustainable renovation measures will be implemented. The fund portfolio will be climate-neutral by 2050.

Where are the medium-term priorities

1. Expansion of the portfolio

The Fund management company is closely monitoring current economic developments. On the buyer side, we expect a generally more cautious investment policy, which should lead to a slowdown in the transaction market. However, the portfolio is to be further expanded in terms of quality. We are aiming for a portfolio size of over CHF 800m. The focus is on fully rented residential properties in good locations with a market-driven return.

2. To achieve a stable return on investment

Ensure growth through attractive acquisitions in line with the strategy and generate additional income by exploiting potential benefits as well as through rapid re-letting and minor refurbishments.

3. Consideration of a listing

A listing on the SIX Swiss Exchange will be sought in the next 2 to 3 years. Prerequisites are good market conditions and an adequate portfolio size.

4. Ensure sustainability

Implementation of the sustainability strategy for the portfolio and certification of all properties, as well as publication of the first GRESB benchmark by 2026 at the latest.

Investment Return 2021

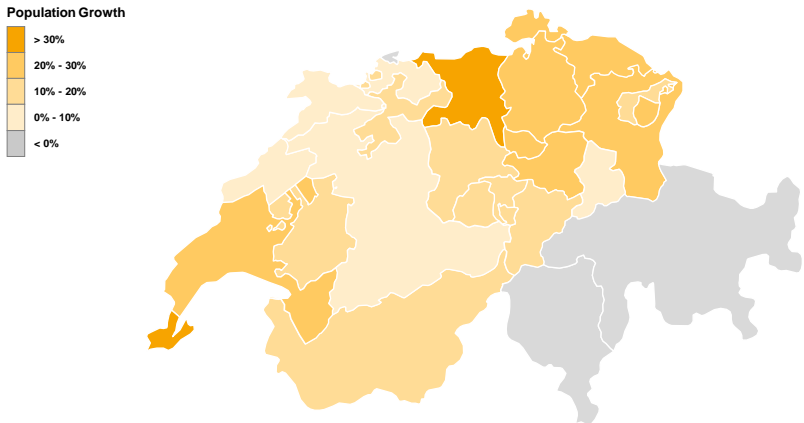

Helvetica funds annual reports as per 31.12.21; For comparable peers most recently published annual or semi-annual report in 2021; SFA investment return indicator (SFA-ARI) for real estate funds as of 30.09.21; SMI and SBI total return for the period 30.12.20 to 30.12.21 according to SIX Swiss Exchange; Retrun 10-year Swiss Federal Bond as per 31.12.21 according to SIX Swiss Exchange

Reasons for Real Estate Funds

- Predictable and safe Returns**
Real estate funds generate attractive long-term investment and distribution yields that are above the average of other asset classes. A profitable investment opportunity - especially in times of low interest rates.
- Stable Swiss Real Assets**
Real estate funds invest in properties. They often provide the necessary stability to a balanced and diversified asset portfolio. The correlation to other asset classes is low - and therefore also the volatility.
- High stability**
Broadly diversified thanks to distribution across a large number of properties. Stable and secure revenues due to conservative leverage and low vacancy rates.
- Inflation protection**
Real estate funds largely protect against inflation. If interest rates rise, rental income tends to rise as well.
- Investor-friendly and tradable**
Real estate funds are transparent and open to public investors as well as qualified investors. You can purchase shares at all Swiss banks. The funds are subject to the strict supervision of FINMA.

Expected population growth until 2045
